- 1 mini-USB connector for a keyboard

1.2 Screen description

Homepage in preview mode   Homepage in standard mode

1   Personal area

This area displays information on the phone user (last name, first name, number, avatar, telephone status, forward, etc.).
There are 2 parts :

Routing	Access forward programming and configuration functions
UserInfo	Information about the user
	Select this area to access the user parameters and status of the phone

2   Notifications area

In idle state :
This area displays information on the latest telephone events such as missed calls, callback requests, messages, etc.
During a call:
The name of your caller and the status of the call (ongoing, on hold, incoming call) are displayed in this area. Pressing on this area during the conversation takes you back to the call screen.

■ Call status

	Incoming call
	Ongoing call
	Call on hold
	Three-party conference

3 Date, time and connectivity area

This area displays time, date, connectivity and customization information (wake-up on, intercom mode on).

	Security mode
	Storage device connected to USB port
	Bluetooth device pairing in progress
	Bluetooth device connected (Other than your Bluetooth handset)
	Headset plugged in
	Wake-up feature activated
	Silent ring activated
	Interphony (See chapter: : Receiving intercom calls)

4 Active area

This area is reserved for running applications and for previews of applications selected by the user. When you start an application, it is displayed in the active zone. If no application has been launched, the active zone displays the application previews that you have preset on the homepage. One application preview allows you to view this application information and easily access it. You can view all previews of the homepage by a horizontal screen scrolling.

■ Add or delete an application on the homepage

	Select the application **Settings**
	Application
	Select the application that you want to add to the homepage or delete from the homepage
	Activate or deactivate preview mode
	Back to homepage

5 Applications area (Homepage in preview mode)

This area allows access to all set applications and to different features of the running application.

6 Applications area (Homepage in standard mode)

You can access your phone applications from this area. Press the application button to access the application.
Once you run an application, the display is the same as the preview mode display.

1.3   Navigation

■ Homepage

The phone homepage can be in standard or preview mode.

Scroll down or up your finger to get the page or menus vertically scrolling, or scroll right or left to get the page horizontally scrolling.

Homepage in standard mode   Homepage in preview mode

Make your selection by pressing on the screen

Go to next screen

Back to previous screen

Back to homepage

■ Application

The homepage in standard mode and the applications bar on the homepage in preview mode allow you to access the phone applications.

Scroll applications to get the desired application

Press the application button to access to the application

## 1.4 IP Touch Bluetooth Wireless handset

LED
Off: operating normally.
Blinking green: in communication.
Green steady: handset charging.
Orange flashing: battery charge low or handset outside coverage zone.
Orange steady: malfunction.

Off-hook/On-hook and Volume/Mute keys

Off-hook/On-hook: press this key to take or terminate a call

Volume/Mute:

- short successive presses to change the handset volume level (3 levels)
- long press to activate or deactivate mute mode

Location of the battery

> If the Bluetooth handset is on its base, you do not need to press the Off-hook/On-hook key to take or terminate the call. Just off-hook/on-hook the Bluetooth handset.

> To install the IP Touch Bluetooth® Handset, refer to chapter: Install the Alcatel-Lucent IP Touch Bluetooth® Wireless handset. Your Bluetooth® device needs to be prepared for pairing. Take the handset off the hook and long press on both handset buttons at the same time. You will hear a 3-note tone and the LED will flash green and orange. The default PIN code is 0000.

- **Installing or replacing the Bluetooth handset battery**
①	• Lift up the battery cover
②	• Slide out the battery holding part

> The battery recharges when the Bluetooth handset is on its base.

> There is a danger of explosion if the battery is replaced incorrectly - use only the battery with the reference 3GV28041AB (1.2V 1500 mAh).

	Select the application **Settings**
	Device
	Bluetooth
	Add device
	Scan
	The set scans for available Bluetooth devices
	Select the Bluetooth device to be paired
	Add the device to the device list
	Enter the device PIN code
	Ok
	Bluetooth device connected

After pairing the Bluetooth accessory, you must define the accessory type in the audio settings.

⚙	Select the application **Settings**
👆	**Device**
👆	**Audio**
👆	**Accessory type**
👆	**BT**
👆	**Ok**

After selecting the accessory type, you must specify the jack accessory:

👆	**Jack accessory**
👆	• headset • handsfree • loudspeaker
👆	**Ok**

7.14 Install the Alcatel-Lucent IP Touch Bluetooth® Wireless handset

⚙	Select the application **Settings**
👆	**Device**
👆	**Bluetooth**
+	**Add device**
⊛	**Scan**
📟	The set scans for available Bluetooth devices... Your Bluetooth® device needs to be prepared for pairing. Take the handset off the hook and long press on both handset buttons at the same time. You will hear a 3-note tone and the LED will flash green and orange.
	Searching for Bluetooth® equipment. Wait for the detected equipment type and address to be displayed
👆	Select the relevant equipment
▢	Add the device to the device list
12 34	Enter the device PIN code (The default PIN code is 0000)
👆	**Ok**
	The 3-note tone indicates that the handset has been installed correctly (the LED flashes green or orange depending on the battery charge level)

After pairing the Bluetooth accessory, you must define the accessory type in the audio settings.

⚙	Select the application **Settings**
👆	**Device**
👆	**Audio**
👆	**Accessory type**
👆	**BT**
👆	**Ok**

After selecting the accessory type, you must specify the jack accessory :

👆	**Jack accessory**
👆	**headset**
👆	**Ok**

• Error messages

The Bluetooth® handset emits a sequence of 4 beeps		Your set is an older generation than your Bluetooth® handset
The set displays an error message indicating that the set and the Bluetooth® handset are incompatible		Your Bluetooth® handset is an older generation than your set

7.15   Uninstall a Bluetooth® device (unpairing)

⚙	Select the application **Settings**
👆	**Device**
👆	**Bluetooth**
👆	**Select the Bluetooth® device to unpair**
✕	**Delete**
	The Bluetooth® device is uninstalled (unpaired)

7.16   Hearing aid kit

If you are using your phone with a hearing device, you must install and activate the hearing aid device (HAC) to avoid hearing discomfort.

	Install the hearing aid kit using the instruction guide supplied
⚙	Select the application **Settings**
👆	**Device**
👆	**Audio**
👆	**Hearing aid** Enable the feature : **YES** The hearing aid kit is activated

7.17 Activate the magnifying glass feature

You must be identified as an administrator to be able to modify this feature.

	Select the application **Settings**
	Admin
	Device
	Phone configuration
	Enter the administrator password
	Enable magnify Enable or disable the feature
	Back to homepage

7.18 Magnifying glass

The magnifying glass feature allows you to zoom in on the active area of the screen.

	Magnify
	The magnifying glass keyfeature lights green when activated The active area of the screen is magnified. You can move this area and zoom any part of the screen you want
	Press the feature key again to go back to normal view ; : **Magnify**

The application bar cannot be magnified.

The magnifying glass feature must be activated in order to be used.

7.19 Set an alarm

	Alarm
	Hour: Enter the alarm time
	Alarm sound: Select the melody of your choice
	Volume: Adjust the alarm volume
	Alarm status Enable the feature
	The associated LED is on: the feature is enabled
	The icon is displayed (connectivity information zone)

When the alarm bell rings, you can choose to repeat the alarm or turn it off.

7.20 File Manager

This application allows you to manage audio files, images, webradios and other media.

Select the application
My files

Select the file type you want:
- Audio
- Picture

All available files of the selected type (on set or storage media connected on USB port) are displayed.
You can also manage your phone multimedia files.

The display time may take longer if the USB storage device contains too many files.

7.21 Delete a file

Select the application
My files

Select the file type you want:
- Audio
- Picture

Enter delete mode
Delete

Select the file to delete

Yes / No
Confirm deletion

Exit delete mode

You cannot delete a file stored on an external device.

7.22 Rename a file

Select the application
My files

Select the file type you want:
- Audio
- Picture

Select the file to rename

Rename

Enter the new file name

Ok
Apply

OR

Cancel the operation
Cancel

You cannot rename a file stored on an external device.

7.23 Copy a file from the external storage device to the phone internal memory

	Select the application **My files**
	Select the file type you want: • Audio • Picture
	Filters Select the storage device
	Select the file to copy
	Copy
7.24 Listen to an audio file
	Select the application **My files**
	Audio
	Filters Display the files for the selected storage device (the phone internal memory or external storage device)
	Select the audio file
	The audio file plays automatically
	Pause: **Pause**
	Start listening again: **Play**
	Stop listening: **Stop**

When released from the manufacturing plant, the audio files hosted on My IC Phone are Alcatel-Lucent property and can be used as is. When a installer or End-User downloads MP3 files via a USB link, they are responsible for the Intellectual Property Right requirements related to such downloads.

7.25 Play all audio files

	Select the application **My files**
	Audio
	Filters Display the files for the selected storage device (the phone internal memory or external storage device)
	Play all
	Listening of all audio files has started

	Stop listening: **Stop all**
	Start listening again: **Play**
	Switch to next track: **Next**
	Listen to tracks in random order: **Random**

> When released from the manufacturing plant, the audio files hosted on My IC Phone are Alcatel-Lucent property and can be used as is. When a installer or End-User downloads MP3 files via a USB link, they are responsible for the Intellectual Property Right requirements related to such downloads.

7.26 Phone wallpaper

You can change the wallpaper on your phone. The image must be stored in the set or on a USB storage device.
If the image is on the USB storage device, you must connect it to the phone:

	Insert your USB device at the back of the phone
	The icon is displayed (connectivity information zone) ;

Change the wallpaper:

	Select the application **My files**
	Picture
	The list of images on the USB device is also displayed
	Filters Display the files for the selected storage device
	Select the image
	Wallpaper
	The selected image is set as wallpaper

7.27   Phone screensaver

You can change your phone screensaver to a default or a personal screensaver. The default screensaver uses predefined images. The personal screensaver uses images you have stored in your phone memory and set up in a screensaver pool.

	Select the application **Settings**
	Application
	Screensaver

	Screensaver : yes / no
	Enable or disable the feature
	Select the screensaver type
	Screensaver type :
	  • Default screensaver
	  • Personal screensaver

> You can set the screensaver timeout, the backlight timeout, the brightness when the backlight is on or off and the refresh images interval.

■ Add an image for your personal screensaver

> The images have to be stored in the phone memory.

	Select the application **My files**
	Picture
	Select the image
	Add to Wakeup Pool The image is added to your personal screensaver pool
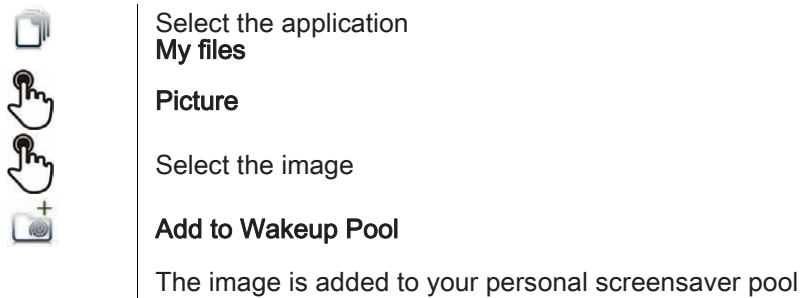

■ Remove an image from your personal screensaver pool

	Select the application **My files**
	Picture
	Select the image
	Remove from SsPool The image is removed from your personal screensaver pool
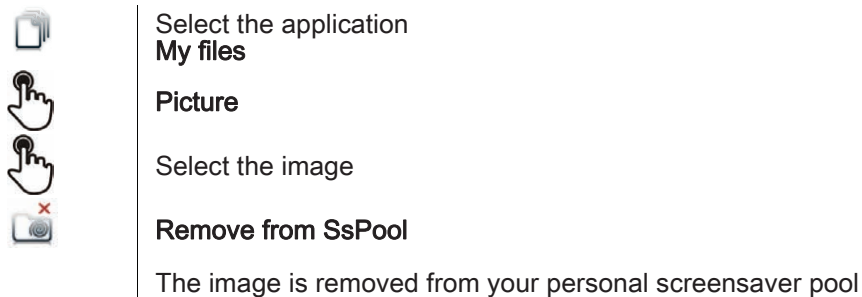

7.28 Customize the user picture

You can change the picture displayed in your personal information area in the top left corner of the screen. The image must be stored in the set or on a USB storage device.
If the image is on the USB storage device, you must connect it to the phone:

|	Insert your USB device at the back of the phone
	The icon is displayed (connectivity information zone)

Change the avatar:

	Select the application **My files**
	Picture
	The list of available pictures is displayed **Filters** Display the files for the selected storage device
	Select the image
	My picture The picture is updated

> The recommended size for the avatar is 100x100 pixels.

7.29 Configure your homepage

You can configure your homepage according to your needs and calling habits.
You can display many applications on the homepage such as your history, contacts, favorite contacts, etc.
The phone homepage can be in standard or preview mode
- Homepage in standard mode : Only application access keys are displayed on the homepage
- Homepage in preview mode : The application access keys and some application previews are displayed on the homepage
■ Choose the homepage layout

	Select the application **Settings**
	Application
	Homepage
	Homepage **Standard** : Homepage in standard mode **Preview** : Homepage in preview mode
	Back to homepage

■ Add or delete an application on the homepage

	Select the application **Settings**
	Application
	Select the application that you want to add to the homepage or delete from the homepage
	Add or delete an application on the homepage
	Back to homepage

Some applications cannot be added to the homepage as preview.

7.30   Change the theme of your phone

	Select the application **Settings**
	Device
	Phone configuration
	Select the current theme in the configuration page
	The available theme list is displayed on the screen
	Select the desired new theme from the list
	Ok Confirm the selection

Changing the theme may take a few seconds.

8.1 Manager/Assistant

The manager/secretary application is a special configuration of at least two multiline stations offering specific additional features via programmable keys.

On each manager/assistant phone, a dedicated application window shows the name of the manager or assistant, the phone presence of the manager or the assistant, the direct call feature access button and the filtering mode access button. The assistant/manager application window can only be displayed when homepage is in preview mode.

■ Assistant station

Call
Call your manager
If you are already on a call, the first caller is placed on hold

Filter
Enable ManagerAssistant filtering and call monitoring

■ Manager Station,

Call
Call your assistant
If you are already on a call, the first caller is placed on hold

Filter
Enable ManagerAssistant filtering and call monitoring

■ On both sets the header of the dedicated assistant/manager application shows the phone presence of the assistant or manager and the filtering mode activated

The assistant or the manager is on a call with a contact

The assistant or the manager is not on a call with a contact

8.2 Select and activate the filtering mode between the manager and assistant phones

The filtering mode allows the assistant and the manager to choose how to route and monitor incoming calls to the manager.

Mode

Select the filtering mode to activate

Filtering is activated on the Manager and the associated Assistant phones

There are four filtering modes.

Manager doesn't receive the calls and Assistant receives them

Manager monitors the calls & Assistant receives them

Manager receives the calls & Assistant monitors them

Off

• **Manager doesn't receive the calls and Assistant receives them**
When a caller is calling the Manager phone, the call is directly forwarded to the Assistant phone if the caller is not a priority caller (not registered on the "White list").

- **Manager monitors the calls & Assistant receives them**

When a caller is calling the Manager phone, the call is directly forwarded to the Assistant phone if the caller is not a priority caller (not registered on the "White list").

In this filtering mode, the manager is notified of the incoming call routed to the assistant. If necessary, the manager can pick up the incoming call before the assistant answers the call. The assistant can see the name of the caller in the history preview pane and the manager's presence status changes to "busy".

The manager picks up the incoming call:

	Monitored call
	Control
	Answer displayed call
- **Manager receives the calls & Assistant monitors them**

In this filtering mode, the assistant is notified of the incoming call on the manager phone. If necessary, the assistant can pick up the incoming call before the manager answers the call.

The assistant picks up the incoming call:

	Monitored call
	Control
	Answer displayed call
- **Off**

The manager/assistant feature is deactivated. There is no routing and monitoring between the two phones.

8.3 Transfer a call to the manager phone

When on a call, the assistant can directly transfer the call to the manager.

	The assistant is on a call
	To manager
	The call is forwarded to the manager
8.4 Define a priority number ("White List")

A registered number in the "White List" is a priority number. A priority number will always directly reach the Manager phone even if a call filtering mode is activated.

 Only the manager set can add a priority number

■ You are on a call. You wish to add your contact to the list.

If the "White List" button is green, it means that your contact is already registered and you do not need to add the contact to your "White List".

	White List
	The contact is added to the list The "White List" green light is on.
■ You are not on a call. You wish to add a contact to the list.

	Settings
	Application
	White List
	Add Contact
	Enter the first letters of the name, name-first name or the initials of your correspondent
	Select your correspondent from the list
	The contact is added to the list

8.5 Delete a priority number ("White List")

■ You are on a call. You wish to remove your contact from the White list.
The "White List" green light is off.

	White List
	The contact is removed from the list If the "White List" button is not green, it means that your contact is not registered so you do not need to remove them from your "White List".

■ You are not on a call. You wish to remove your contact from the White list.

	Settings
	Application
	White List
	Delete
	The contact is removed from the list

9.1   Introduction

This application is for synchronizing your address book between your phone and your PC Outlook application.

The default maximum number of contacts you can synchronize between your phone and your PC is 500. However, your administrator can increase this to up to 1,000. Please ask your administrator for the maximum number of contacts.

9.2   Prerequisites

- The supported operating systems are:
- Microsoft® Windows® XP Service Pack 2 and higher (32 bits)
- Microsoft® Windows® VISTA (32 bits and 64 bits)
- Microsoft® Windows® 7 (32 bits and 64 bits)
- The Outlook supported versions are: Microsoft® Outlook 2000, Microsoft® Outlook 2002, Microsoft® Outlook 2003, Microsoft® Outlook 2007, Microsoft® Outlook 2010.
- The minimal system requirements are:
- Processor : P4 Class or higher
- RAM memory: at least 256 Mo
- Minimum available disk space: 100 Mo
- Screen: 800x600 True Color
- Network card is required

9.3   Installing the application on your PC

The application comes as an executable installation file (.exe).

1) Run the application executable file
2) Select the language: this defines the installation and the applicatio language
3) Read and agree the license Agreement
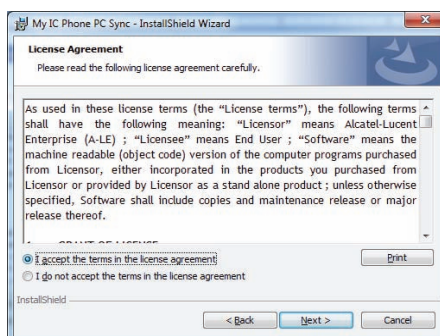

4) Select the application destination folder on your PC (make sure you have the necessary administration rights to install the application in the selected folder)
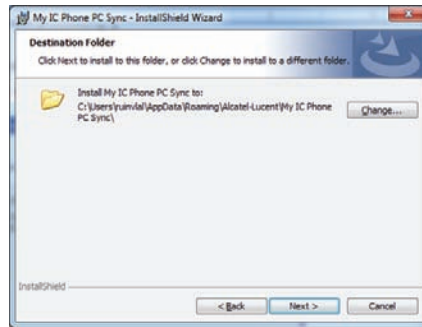

5) Follow the installation steps.

9.4 Uninstalling the application

There are two different ways for uninstalling the application:
- Access the feature "Add/remove programs" (Windows® XP) or "Programs and features" (Windows® Vista ou Windows® 7).
- Run the installation executable file and select the "Remove" option.

9.5 Repairing the application

If the application becomes corrupted, you can repair it.
1) Run the application installation executable file.
2) Select the "Repair" option.
3) follow information displayed on the screen

9.6 Configuration

■ Configuring the application on the PC.

> The application is ready to work but it is recommended to check the application default configuration.

1) Open the application configuration : in the task bar of your PC, select the "Settings" menu of the synchronization menu.

2) You can define :

- The profile and the Outlook folder to use for synchronizing contacts.

  The default profile and Outlook folder will be used for synchronizing unless you specify a folder and profile. You can change the profile and folder used. You can define a profile for synchronizing the contacts. You are advised to create an Outlook subfolder dedicated to your phone contacts and to work from this folder. This will help protect your general Outlook contacts on your PC.

- Date range for synchronizing: only events during this period will be synchronized.

- The conflict policy (determines how the application should behave when different changes have been made on the phone and the PC)
  - the most recent modification replaces the oldest,
  - the phone datas always replace the ones on the PC,
  - the PC datas always replace the ones on the Phone,
  - the modified datas on the phone are copied on the PC and modified datas on the PC are copied on the phone (the datas are duplicated),
  - no synchronisation is done.

- The silent sync : you can choose to display or not the synchronization progress bar and the synchronization summary.

- The port used by PC for synchronization : if default port cannot be used on the PC you can change it.

  If you modify the port used by the application, you have to do the same modification on the phone side.

- URL for downloading the application updates.

- Startup: if enabled, the application will be run when Windows® starts

> Besides Settings item, there are a few item that allow you to display the last synchronization summary, to create or delete a pairing between your phone and your PC, to open the application online help, to display information on the application version or to exit the application.

■ Configuring the phone

	Settings
	Application
	Synchronization

Server address	Enter the IP address or the complete network name on which the synchronization application is installed.
Server port	This data defines the port used on the PC for synchronization. The port must be the same as the one filled in the PC application.
Warning when exceed	Choose if you wish to be informed when a maximum number of items for synchronization is reached (the default setting is 500 items but this may have been changed by the administrator - ask your administrator for the maximum number of contacts).
Sync. button	Choose to display the synchronization button in the applications bar of your My IC Phone.
	Back to homepage

> If you try to start the synchronization before configuring it, you will access the Synchronization settings.

9.7   Synchronize your phone and your PC

■ Start synchronization

	Synchronization (if enabled in the synchronization settings)
	OR
	Settings
	Application
	Synchronization
	Synchronization : start

If not deactivated in the application configuration (Silent Sync) you can see the synchronization summary on the screen.

> During the synchronization, you can at anytime:
> - see synchronization progress and phases,
> - display details of synchronized items,
> - cancel the synchronisation.

> The synchronization summary lists all the synchronized items.

> From the application menu on the PC (Task bar), you can see at anytime the summary from the last synchronization.

■ Pairing your phone and your PC

When you run the synchronization for the first time, you must pair your phone and your PC.

1) Accept the certificate required by the phone (ensure that the certificate comes from the target PC),
2) A pairing PIN code (PIN) is displayed on the phone screen.
3) The phone is detected by the PC and you are prompted to enter this PIN code and a name for the pairing.
4) The synchronization is automatically started when the pairing is established.

> This pairing has to be done only for the first synchronization.

> From the PC application menu, you can delete this pairing.

■ Synchronization

During the synchronization, you can monitor progress and view the summary once the process is completed. Make sure this option ("Silent Sync") is configured correctly in the Synchronization settings on the PC side. You can also see which items are modified and where by clicking on the detailed view button.

> Synchronization takes about 15 seconds for 500 contacts. You can receive and make calls during synchronization but this can make the synchronization process longer.

> The synchronization function is most commonly used to synchronize your PC Outlook contacts with your phone contacts list. Once you have run the initial synchronization, if you delete a contact from the phone contacts list, the contact will be deleted from Outlook during the next synchronization (and vice versa). You are advised to create an Outlook subfolder dedicated to your phone contacts and to work from this folder. This will help protect your general Outlook contacts on your PC.

9.8   Troubleshooting

Below is a troubleshooting guide that can help you resolve any problems that might occur.

Installation says you do not have write permissions in this folder	You are probably not permitted to change the folder in which you are trying to install PC Sync. Try installing it in another location.
Phone displays "HTTP error, HTTP request failed"	Please make sure PC Sync is started in the PC. Please check if the same port is set on the phone and on the PC Please check you correctly entered PC address. Please check your firewall settings. The port may be closed by the firewall. Try to change the port.
PC Sync displays "Unable to listen to the port"	Please make sure no other applications are using this port. Please make sure the firewall allows listening to this port. Try to change the port.
PC Sync displays "Selected folder has been deleted" or "Cannot open Outlook profile"	The profile or the folder that My IC Phone Synchronizer is configured to synchronize with has been deleted. Select another profile or folder in settings.
PC Sync displays "Outlook is not installed"	My IC Phone Synchronizer could not find a supported version of Outlook on the PC. Install Outlook.
PC Sync displays "Error communicating with Outlook"	My IC Phone Synchronizer could not communicate with Outlook. This might be because Outlook has been installed but not yet set up properly or is malfunctioning. Starting Outlook itself may provide information on what is wrong.

Guarantee and clauses

Safety Instructions

- Changes or modifications to the equipment not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
- **Intellectual Property Rights**
  When released from the manufacturing plant, the audio files hosted on My IC Phone are Alcatel-Lucent property and can be used as is. When a installer or End-User downloads MP3 files via a USB link, they are responsible for the Intellectual Property Right requirements related to such downloads.
- To limit the risk of interference, people with pacemakers must keep the wireless telephone away from their equipment (minimum distance of 15 cm).
- It is recommended to follow the standard acceptance procedures before using this equipment in human safety critical areas (hospitals...).
- The headset includes magnetic elements that may attract sharp metallic objects.
- There is a danger of explosion if the battery is replaced incorrectly - use only the battery with the reference 3GV28041AB (1.2V 1500 mAh) 3GV28041AB (1.2V 1500 mAh) (Bluetooth Handset only).
- Battery charge (Bluetooth Handset only) : Charge the battery for about 16 hours before initial use.

Regulatory Statements

EU/EFTA
This equipment is in compliance with the essential requirements of R & TTE Directive 1999/5/EC. The Declaration of Conformity may be obtained from your installer.

USA and Canada
This device complies with Part 15 of the FCC Rules and with RSS-210 of Industry Canada. Operation is subject to the following two conditions : (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to Part 15 of the FCC Rules and ICES-003 of Canada. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try correct the interference by consulting the dealer.

Exposure to Radio Frequency Signals.
This device has been designed and manufactured not to exceed the SAR (Specific Absorption Rate) radio frequency power transmission limits established by the different countries concerned. The SAR value for the Bluetooth handset is 0.09 W/kg (the globally accepted maximum limit being 1.6 W/kg).

User Instructions

Only use the handset in temperatures between -5° C to +45° C (23° F to 113° F).

This apparatus is Hearing Aid Compatible (HAC).

Acoustic shock protection

The acoustic level of the signal generated by the handset earpiece is less than 130 dBspl for a transient signal (123 dBspl for Australia) and less than 118 dBspl (rms) for a continuous signal (120 dBA for Australia).

Directive 2003/10/EC specifying the risks inherent in noise at work

The ring contributes towards overall daily noise; at its maximum setting, the level is 105 dBA at 60 cm from terminal.

To reduce the level, the following is recommended:

- reduce the setting (9 levels of 5 dB)

- program a progressive ring.

This device can be used for indoor operation in all the countries; you must consult your installer for an outdoor usage.

Privacy

Privacy of communications may not be ensured when using the Bluetooth handset or any additionnal Bluetooth device

Disposal

The equipment must be returned to a collection point for electronic equipment waste disposal. Defective batteries must be returned to a collection point for chemical waste disposal.
